“GET READY TO LEARN IN A NEW, INNOVATIVE AND MEMORABLE WAY”
LIVE, UNIQUE & INTERACTIVE LEARNING
In addition to the professional Case Theater veterinarian/client improv presentation, NAVC LIVE: Portland features General Sessions, Short Communications, clinical content in a non-clinical setting, as well as engaging networking opportunities.

**ACTIVE VOICE - ON YOUR FEET!**

While most conferences are packed with quality content, it can be difficult to retain everything you are exposed to as an audience member; it all begins to blend together in a general wash of information. Not this week!

NAVC LIVE is proud to present Case Theater, an upgraded conference experience that brings valuable content to life! By partnering with veterinary experts in multiple content areas, On Your Feet’s interactive experiences and entertaining performances will make your learning journey more fun, more engaging and more memorable.

On Your Feet also specializes in making any conference more interactive by designing experiential exercises that help participants connect, learn, reflect and play.

On Your Feet is a small consultancy based in Portland, OR. Since 1996, they have used improvisation to help organizations create, relate and communicate... reinforcing that learning is fun! By sharing the power of improv we help make work and life better at conferences all over the world for clients such as Nike, Banfield, GE, Xerox, Procter & Gamble, Intel and Disney.

**WHY IMPROV FOR BUSINESS?**

Improv actors are real-time, market-driven innovators: A creative team works together to create something (a story) to satisfy a customer (the audience) under extreme time pressure (instantly, on the spot). They work with a set of established practices to help them step out into uncertainty, work in a state of constant flux and change, and together create something successful and engaging. The great thing about these practices is that absolutely anyone can learn and apply them to their work... and life.

NAVC LIVE: Portland introduces a unique learning experience through Case Theater, featuring On Your Feet. This special module uses improvisational theater to bring content to life and give you a deeper connection to retain and better apply the concepts you’ll be learning. Connect, interact and most of all... have a ridiculously good time!
NOW THAT YOU’RE HERE...

REGISTRATION HOURS:
Saturday, August 19: 1:00 - 7:00 PM
Sunday, August 20: 8:00 AM - 6:00 PM
Monday, August 21: 7:00 AM - 7:00 PM
Tuesday, August 22: 7:00 AM - 7:00 PM
Wednesday, August 23: 7:00 AM - 1:00 PM

CE CREDIT HOURS:
NAVC LIVE: Portland provides attendees with 26 RACE approved credit hours. Please see p. 20 for your Record of Participation.

DINING IN PORTLAND
Looking for great options for breakfast, lunch or dinner? Visit eater.com/maps/best-portland-restaurants-38 for some of the best locations in Portland. Satisfy your palate with a variety of fine foods and bakeries.

And if your in need for something on the go, check out some of the cities savory food trucks! https://roaminghunger.com/food-trucks/or/portland/

Go to: “Find Trucks” and click on “Portland”
Enter: 921 SW Sixth Avenue, Portland, OR 97204 to find local trucks near the Hilton and search by the time of day.

End your day with the guilty pleasure of Voodoo Doughnuts at the original shop. Select from more than 50 outrageous creations from a Vegan Toasted Coconut to Maple Bacon Bar or go beyond decadent with the Memphis Mafia: Fried dough with banana chunks and cinnamon covered in glaze, drizzled in chocolate and peanut butter with peanuts and chocolate chips on top. Remember, bring cash (ATMs on-site)!
22 SW 3rd Avenue, Portland, OR, 97204, +1.503.241.4704.

SKYLINES I & II
Ain’t Doin’ Right: Approaches to the Clinically Vague

Course Leader: CHRISTOPHER BYERS

The chronically vomiting patient can be a clinical mystery. Sepsis and septic shock are meaningful causes of morbidity and mortality in dogs and cats. Through clinically applicable case discussions we’ll review appropriate diagnostic testing and therapeutic interventions. Effective communication tactics to relay this complex information to pet parents will be emphasized.

Behavior

Course Leader: KAREN OVERALL

Studies show that well over half of all clients in any veterinary practice have a question about their pet’s behavior – and it is never asked. Most behavior questions that are asked, are not answered. Most cats and dogs entering veterinary practices are sufficiently fearful that their behaviors will make extensive examination difficult, at best, and could obscure medical issues. To the client – everything that matters about the patient in front of you is defined by its behavior. Behaviors that don’t work for the relationship result in millions of physically healthy animals being relinquished, abandoned, or killed annually. The single biggest difference a veterinarian can make in the lives of their patients revolves around their mental health needs and this process starts by learning what those needs are, how client education and patient intervention can help, and how to talk to clients about behavioral health. These presentations are focused on taking the fear out of behavioral medicine (for the veterinary staff) and providing basic tools that make practice more fun, safer, and more intellectually and emotionally rewarding.

Cardiology

Course Leader: ANDREA ERIKSSON DE REZENDE

Dr. Eriksson De Rezende will present a practical approach to the diagnosis and management of canine and feline cardiac disease. She will focus on clinical signs that we see on a day-to-day basis in practice, and the questions that need to be asked to get to the correct diagnosis. The goal is to provide useful information regarding diagnosis and treatment of cardiac disease in an approachable format for the general practitioner.

Dermatology

Course Leader: DUNBAR GRAM

Pruritus and atopic dermatitis are common problems often associated with a constellation of pathological processes and increasingly methicillin resistant staph infections. Very few dermatological diseases are actually curable but many are controllable. Compassionate use of antipruritic therapy is palliative and an important part of patient care. Chronic nonspecific therapy may result in adverse effects and allow progression of the underlying disease process leading to an even more difficult to manage situation. These sessions will explore the dos and don’ts of dermatology, using case presentations to demonstrate best practices while also showing how improved communications can result in better patient outcomes.

Endocrinology

Course Leader: CHRISTOPHER BYERS

Common canine/feline endocrinopathies can be challenging to diagnose, and are often the cause of varied or clinically vague signs. This session will review commonly occurring endocrinopathies, and use case presentations to illustrate how appropriate history, diagnostics and communication insure better outcomes.
Oncology
Course Leader: SUSAN ETTINGER
Got cancer questions? Whether it is skin masses and cytology, common tumors you deal with everyday in practice, or your FAQ about chemotherapy, the oncology track will cover it all (well most of it!). Dr Sue’s talks will provide practical tips and tricks you can use tomorrow when you go back to work. Plus we will also cover the hardest part, how to break bad news to clients - to make it more effective, efficient and better for you and your team as well. We all hate cancer, but come learn how managing these cases can be better for you, your patients, and clients.

Ophthalmology
Course Leader: CARYN PLUMMER
Dr. Plummer will provide insight into ophthalmic emergencies, including how to recognize and respond to ophthalmic pain and conditions that can lead to vision loss. Her sessions will also cover diseases of the ocular surface and those that obscure corneal clarity. Diseases of the retina will also be reviewed. Ophthalmoscopy requires practice and patience. There are certain instances when findings of an ophthalmoscopic examination can change a treatment plan or a prognosis. What should you look for and when? And then there are the masquerading diseases, when an ocular condition is not what it appears to be. Join her as she unravels the mystery of the eye, and explores challenging cases during the Case Theater presentation.

Pursuit of Happiness
Course Leader: ANDY ROARK
Whether it’s your boss, your peer, or someone who works for you, there are right and wrong ways to ask for what you need. In these sessions, we will talk about changing people’s behaviors to improve communications and outcomes. Dr. Andy Roark and Meg Pierson mix laughter and learning as they discuss improvisation and angry clients. If you’re interested in communicating more effectively across your entire practice, this is a great session to attend.

Pursuit of Happiness
Course Leader: MARY GARDNER
Is happiness possible in the veterinary industry, in our personal lives, in our everyday connections – heck yes! These sessions will look at a new approach to finding happiness, sustaining positive change in your life and fuel happiness at work!
CHRISTOPHER BYERS, DVM, DACVECC, DACVIM (SAIM), CVJ
Dr. Christopher G. Byers is the Medical Director at VCA MidWest Veterinary Referral & Emergency Center in Omaha, NE. He received his BS degree in Animal Sciences from Colorado State University, and his DVM from Cornell University’s College of Veterinary Medicine. He is board-certified in small animal emergency and critical care, as well as small animal internal medicine. He is also a Certified Veterinary Journalist in the American Society of Veterinary Journalists. Dr. Byers enjoys clinical research, and his current areas of interest include immune-mediated diseases and abdominal compartment syndrome. He publishes a weekly blog for pet owners: CriticalCareDVM.com with the sole purpose of educating pet parents about the benefits of partnering with board-certified veterinary specialists. He has co-authored the textbook, Handbook of Veterinary Emergency Protocols: Dog and Cat.

ANDREA ERICKSSON DE REZENDE, DVM, DACVIM (CARDIOLOGY)
Dr. Andrea Eriksson De Rezende is a native of Eugene, OR and completed her undergraduate studies at Willamette University in Salem, OR. She received her veterinary degree from Oregon State University in 2005, which was followed by a one-year rotating small animal and surgical internship at Oregon State University. She then completed a three-year residency in cardiology at North Carolina State University. Dr. Eriksson De Rezende became a Diplomate of the American College of Veterinary Internal Medicine (Cardiology) in 2009. Until mid 2011, Andrea was an assistant professor of cardiology at Virginia-Maryland Regional College of Veterinary Medicine. Andrea then moved to Brooklyn, NY for 5 years to join the Veterinary Emergency and Referral group. Today, she lives with her family in New Jersey and practices at Blue Pearl in Paramus, NJ. Her research interests include management of congestive heart failure with particular interest in the renin-angiotensin-aldosterone system as well as advanced cardiac imaging. Personal interests include indoor cycling, travel and singing.

SUE ETTINGER, DVM, DACVIM (ONCOLOGY)
Dr. Sue Ettinger is a veterinary cancer specialist, international speaker, book author, and is head of the Oncology Department at the Animal Specialty & Emergency Center in NY. She is one of 400 board-certified specialists in medical oncology in North America. She received her veterinary training at Cornell University and completed her residency in medical oncology at the Animal Medical Center in NYC in 2003.

Also known as Dr Sue Cancer Vet®, Dr. Sue is the co-author of the Second Edition of The Dog Cancer Survival Guide, which is a best-selling book in small animal health for the last several years. She co-hosts the podcast The Pet Cancer Vet. Dr. Sue is most passionate about raising cancer awareness and she has developed “See Something, Do Something, Why Wait? Aspirate.” to promote early cancer detection and diagnosis. Dr Sue’s popular Facebook page has over 30,000 fans. She can be found on social media at www.facebook.com/DrSueCancerVet and @ DrSueCancerVet on Twitter.
MARY GARDNER, DVM
Dr. Gardner loves a grey muzzle! Her professional goal is to increase awareness and medical care for the geriatric veterinary patient and to help make the final life stage to be as peaceful as possible, surrounded with dignity and support for all involved.

DUNBAR GRAM, DVM, DACVD
Dr. Gram is Dermatology service chief at the University of Florida. Prior to joining UF, he owned and operated four dermatology practices in Virginia and co-managed two 24 hour emergency/internal medicine hospitals.

KAREN OVERALL, BA, MA, VMD, PHD
Dr. Karen L. Overall holds BA, MA, VMD and PhD degrees and is a Diplomate of the American College of Veterinary Behaviorists. She has served on the faculties of both the veterinary and medical schools at Penn and lectures at veterinary schools worldwide. She is currently a Senior Research Scientist in the Biology Department at the University of Pennsylvania. Dr. Overall has given hundreds of national and international presentations and short courses and is the author of over 100 scholarly publications, dozens of textbook chapters and hundreds of abstracts, columns, and commentaries. She has authored Clinical Behavioral Medicine for Small Animals (Elsevier, 1997), Manual of Clinical Behavioral Medicine for Dogs and Cats (Elsevier, 2013), and the DVD, Humane Behavioral Care for Dogs: Problem Prevention and Treatment (Elsevier, 2013). She is the founding editor-in-chief for Journal of Veterinary Behavior: Clinical Applications and Research (Elsevier).

CARYN PLUMMER, DVM, DACVO
Dr. Plummer is a 2002 graduate of UF. Following internship at MSU, she returned to UF for a residency. She received board certification from ACVO in 2006 and remained on as faculty at UF. Research interests include corneal disease & glaucoma.

ANDREW ROARK, DVM, MS
Andy Roark DVM MS is a practicing veterinarian, international speaker, author, and media personality. Dr. Roark has been voted Practice Management Speaker of the Year at NAVC, one of the world’s largest veterinary conferences two years running.

This program 172-30295 is approved by the AAVSB RACE to offer a total of 82.00 CE Credits (26.00 max) being available to any one veterinarian: and/or 82.00 Veterinary Technician CE Credits (26.00 max). This RACE approval is for the subject matter categories of:

*Category One: Scientific*

*Category Two: Non-Scientific-Clinical*

*Category Three: Non-Scientific-Practice Management/Professional Development* using the delivery method of Seminar/Lecture. This approval is valid in jurisdictions which recognize AAVSB RACE; however, participants are responsible for ascertaining each board’s CE requirements. RACE does not “accredit” or “endorse” or “certify” any program or person, nor does RACE approval validate the content of the program.

Introducing the Nobivac® Canine Flu Bivalent vaccine

- Protection against Canine Influenza Virus (CIV) H3N2 and H3N8 in one vaccine
- 2-in-1 coverage offers safe, up-to-date protection
- Monovalent CIV H3N2 and CIV H3N8 vaccines are also available

When to vaccinate

- Vaccinate puppies from 7 weeks of age with 2 doses administered 2 to 4 weeks apart
- Annual revaccination with 1 dose is recommended

Reasons to vaccinate

- Keep pet parents happy by sparing their pets from annoying cough attacks
- Protect dogs under your care and in the community from highly contagious CIV
- Prevent outbreaks in your practice and boarding facility

DON’T WAIT, VACCINATE
