

Trust Your Vet Tech

One uniform.
Countless skills.

Ask us your questions!

Our veterinary technicians work with veterinarians to give your pet the best care possible. **Help us to make a difference for your pet and all of the pets in our care.**

It is our pleasure to serve you and your pet. Veterinary technicians have an essential role in delivering care to your pet. We assist in surgeries and perform advanced procedures. We conduct medical tests, take tissue and blood samples, administer anesthesia, assist with surgeries and post-surgical monitoring, pain management, long-term chronic illness

treatments, provide intensive care nursing and monitoring, and work with pet owners, among other duties. And, oh, yes, find time for head scratches and belly rubs.

You don't need to save all of your questions for your veterinarian. If you have a question, don't hesitate to ask your vet tech and we'll help make the most of your visit.
